PLASCO'S WEHOLITE MANHOLES

Weholite provides solutions for all sewerage and storm water systems, including Sewerage Manholes, Valve chambers, Inspection chambers etc.

Manholes are normally prefabricated. Pipe connections can be manufactured to suit any standard sewer or storm water pipe. The inclinations and angles of the connections can be set as required. Standard manhole covers can be selected according to application or traffic loads. If required, ladders can be fitted inside the manhole. Available up to 3000mm diameter & any specified depth.

Manholes for high water table are designed accordingly. Reinforced concrete base to be designed to counter buoyancy and to anchor HDPE puddle on the manhole.

Applications

- › Sewer Manholes
- › Valve Chambers
- › Inspection Chambers
- › Access Shafts

Features & Benefits

- › Significantly Reduced installation time
- › Tough, impact resistant
- › Lightweight, easy to install
- › Long service life (more than 100 years)
- › Tested for resistance to root ingress
- › Chemically resistant, no corrosion
- › Variety of options and configurations
- › Excellent of options and configurations
- › Tested prior to delivery for water tightness
- › Welded HDPE pipe connections are root ingress resistant.
